

Village by Village

Washing Out Cholera in Haiti

Water With Blessings, Inc. is embarking on a journey to permanently wash out cholera deaths in Haiti...one village at a time.

But we need your help to make it possible!
Will you help us wash out this deadly waterborne disease...village by village?

For every \$60 raised a mother in a village will be empowered to share clean water with her family and three neighbors for a **lifetime**. Is it really that simple? Yes, it really is!

It takes a village to help a village. Thank you for being part of our village of support....blessings!
